	Section 15.212 Modular Transmitters						
Request for Modular Approval				Request for Limited Modular			
				Approval			
Requirements		EUT Conditions	Comply(Y/N)				
	1	Single N	pproval Requirements				
1	The radio elements of the modular		odular	Refer to external photos.	Υ		
	transmitter must have their own		own	This module has a shield cover.			
	shielding. The physical crystal and		al and				
	tuning capacitors may be located		cated				
	external to the shielded radio		io				
	elements.						
2	The modu	ular transmitter mu	ıst have	The module transmits with	N		
	buffered i	modulation/data ir	nputs (if	un-modulation signal.			
	such inputs are provided) to ensure						
	that the module will comply with						
	part 15 requirements under						
	conditions of excessive data rates or						
	over-modulation.						
3	The modular transmitter must			The module doesn't have its own	N		
		own power supp	oly	power supply regulation.			
	regulation						
4		ular transmitter mu		The modular transmitter has two	Υ		
		ith the antenna an		PCB antennas, one is TX,the other			
		ion system require	ments	is RX and antennas gain are 0dBi,			
		03, 15.204(b) and		Refer to internal photo.			
	, ,	. The antenna mus					
	-	nently attached or					
		e" antenna coupler	-				
		ons between the m					
		ntenna, including t	he				
	· ·	ne "professional	- 202 :				
	installation" provision of §15.203 is						
	not applicable to modules but can						
	apply to limited modular approvals		•				
	under par	ragraph (b) of this	section.				

5	The modular transmitter must	The modular transmitter is tested in	Υ
3	be tested in a stand-alone	a stand-alone configuration. Please	
	configuration, i.e., the module	refer to setup photo.	
	must not be inside another	refer to setup photo.	
	device during testing for		
	compliance with part 15		
	requirements. Unless the		
	transmitter module will be		
	battery powered, it must		
	comply with the AC line		
	conducted requirements found		
	in §15.207. AC or DC power		
	lines and data input/output		
	lines connected to the module		
	must not contain ferrites,		
	unless they will be marketed		
	with the module (see		
	§15.27(a)). The length of these		
	lines shall be the length typical		
	of actual use or, if that length is		
	unknown, at least 10		
	centimeters to insure that there		
	is no coupling between the case		
	of the module and supporting		
	equipment. Any accessories,		
	peripherals, or support		
	equipment connected to the		
	module during testing shall be		
	unmodified and commercially		
	available (see §15.31(i)).		
6	If using a permanently affixed	Refer to the label.	Υ
	label, the modular transmitter		-
	must be labeled with its own		
	FCC identification number, and,		
	if the FCC identification number		
	is not visible when the module		
	is installed inside another		
	device, then the outside of the		
	device, then the outside of the		
	installed must also display a		
	label referring to the enclosed		
	module. This exterior label can		
	use wording such as the		
	following: "Contains		

	Transmitter Module		
	FCC ID: 2AIWW-PD-V11-H" or		
	"Contains		
	FCC ID: 2AIWW-PD-V11-H".		
	Any similar wording that		
	expresses the same meaning may		
	be used. The Grantee may either		
	provide such a label, an example		
	of which must be included in the		
	application for equipment		
	authorization, or, must provide		
	adequate instructions along with		
	the module which explain this		
	requirement. In the latter case, a		
	copy of these instructions must		
	be included in the application for		
	equipment authorization.		
7	The modular transmitter must	Refer to manual.	Υ
7	The modular transmitter must comply with any specific rules	Refer to manual.	Υ
